Letter of Recommendation

I am pleased to share my impressions of Sameeksha as a recommender, as I have known her personally for over years now. I have had numerous collaborations with her in BNMIT. Sameeksha is lively, attentive, has a very high drift for computer science and absolutely a very memorable student that I have met.

As a professor, I have taught Sameeksha a few of the crucial courses - Computer Graphics and Visualization and Data Science courses over a period. I am proud to see how she has evolved during this time period and grown as a successful engineer.

During the 5th semester, I mentored her when she worked on a Robot Simulation project using OpenGL. She took on the responsibilities of managing the team of 3 and organised the tasks effectively. Being technically strong with the ability to manage a team is a plus point for Sameeksha. Even though she was a fledgling at the time, she and her teammates did a great job building a high-quality simulator. As her goals increase and projects get more complicated, she would gain even more from honing her project management abilities.

In the 6th semester, I taught the course "Data Science", which requires students to get the core concepts right and develop strong problem-solving and programming skills. During this phase, I guided her through the project on Early Alzheimer's detection. Being an attentive listener and analytical thinker, she would readily implement the changes that I posed in the project on time. Her thinking was realistic and the way she could relate systems and models with real life entities is on point. More exposure to large-scale, real-world projects would allow her to deepen her practical abilities and acquire industry knowledge, which will surely advance her technical and professional development.

Sameeksha is a fast learner with a passion for technology. She was capable of capturing the finer aspects of the topics explained in the classroom and she could meaningfully add on to the discussion at hand. She is a confident, punctual, soft-spoken and an obedient student who has submitted all her coursework and assignments well within the deadline. I am very sure that a dedicated young girl like her will excel in every activity she is involved with.

Given my experience with her and her interest in exploring new things. I would love to recommend Sameeksha for her masters. I have high expectations for her and I am confident that she will be an invaluable asset to your community.
