Letter of Recommendation

As the Associate Professor in the Department of Computer Science and Engineering of BNM Institute of Technology, Bangalore, it is with delight that I write this letter of recommendation for Sameeksha and contribute her to the quest for achieving excellence in the domain of Computer Science by securing a seat for the Master's programme at your illustrious university. As her professor, I had watched her in close supervision.

Sameeksha was under my guidance during her under-graduate studies in Computer Science and Engineering. As a professor who taught her subjects like Software Project Management and Finance, Artificial Intelligence and Machine Learning, I have witnessed a great potential in Sameeksha. She has been an interactive and bold student who is very active in classroom discussions. Her strength in comprehending the theoretical background and functionally applying them was evident during theory and lab components. Balancing between principles and pragmatism, Sameeksha demonstrates her ability to take a task to its fruition. During the course of the project, this was clearly evident in her mental grasp of the underlying concepts, meticulous pursuit of tasks, care for details and intellectual rigour. Sameeksha's ability in conducting diligent search, browsing technical papers, delineating pros & cons stand out for her engineering rigour. She is an excellent team player with strong collaborative skills and with an ability to elicit increased levels of participation from team members. Contagious enthusiasm and resoluteness, ability to cope with the demands of her schedule are among her other citables. Her zeal to learn and deliver the best, resulted in a novel project appreciated by her peers and faculty.

Subsequently, being the guide for her capstone project 'Robust Deep Learning Method for Lung Cancer Detection', I saw her nurture under a simulated environment. Her project revolved around the domains of Computer Science, ML, and AI seeking an algorithm that uses less computational power while deriving a higher probability in Lung Cancer Detection. Navigating through this project, she overcame all her hurdles and incorporated all the feedback efficiently while being team leader of the project. In my view, Sameeksha is well-rounded and cordial. She is sincere and disciplined and has maintained a consistently good academic record. This demonstrates her ability to excel with sheer perseverance and diligence. She is open to criticism and constantly works in areas with scope for improvement.

She went well beyond the course requirements, by taking up internships and courses in her area of interest including Software Engineering, Project Management, Artificial Intelligence and Web Development. I was impressed by how quickly she acknowledged feedback and worked diligently to make it better. Bearing all that in mind, I strongly recommend Sameeksha for enrolment in your university, and I have no doubt that she will bring honour to your institution.
